Question 9: Why is there medium text but no short or any other Text fields?

when we created the file we only choose medium Text in our text field. We didn't choose any other option. That's why we don't see any other field except medium Text.

Question 10: In the mapping figure above (Figure 36), why are only Material Description and Material Number connected (and not the rest of the fields on the left side)?

We already have connected other fields before, and for now other fields no need of connections to activate the program. It only requires Material Description and Material Number. And also there are no suitable item to connect other items.

Question 11: What Rule are you implementing for the Language key for Material Description?

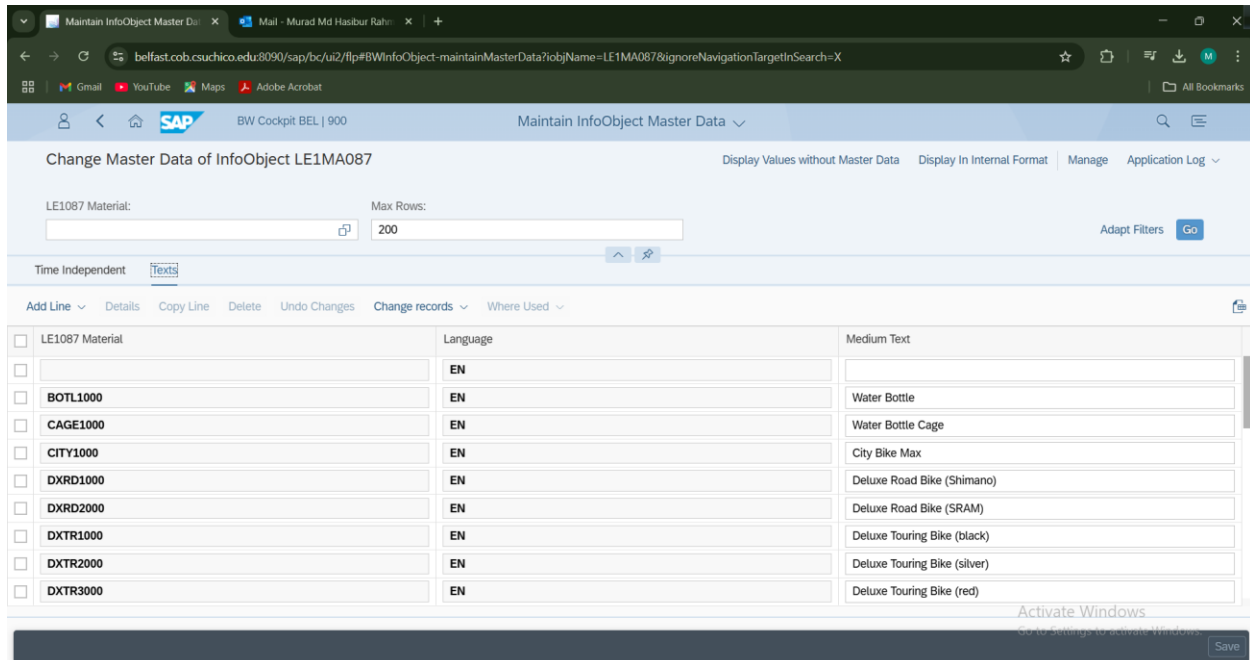

The rule being implemented for the Language key is a Constant rule. This means that the language key is being set to a fixed value, which in this case is English.

Question 12: Are there any non-English Material Descriptions? Why?

No, There is no non-English Material Description. Because we chose it only English. So it has to be in English.

Question 13: Why is the Description Medium in Length?

We can choose Short or long , but instead we chose or we want it as medium . That's why the Description Medium in Length.
